| St Bartholomew's Maths Progression by strand |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | EYFS | Year 1 | 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Counting | estimate how many objects they an see and count them, find the total number of two sets of objects by counting them all | $\bullet$ count to and across $\mathbf{1 0 0}$, forwards and backwards, beginning with 0 or 1, or from any given number $0^{\text {count, }}$ read and write numbers to 100 in numerals; count in multiples of twos, fives and tens | $\cdot$ count in steps of 2,3, and5 from 0, and in tens from any number, forward and backward | $\bullet$ count from 0 in multiples of 4,8, 50 and $\mathbf{1 0 0}$; find 10 or 100 more or less than a given number. | -count in multiples of 6, 7, 9, 25 and 1000 -find 1000 more or lessthan a given number count backwards through zero to include negative numbers | -count forwards or backwards in steps of powers of 10 for any given number up to 1000000 -interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero | -use negative numbers in context, and calculate intervals across zero |
| Place Value | place numbers in order |  | -recognise the place value of each digit in a two-digit number -compare and order numbers from0 up to 100; use and = signs | -recognise the place value of each digit in a threedigit number -compare and order numbers up to 1000 | -recognise the place value of each digit in a four-digit number •order and compare numbers beyond 1000 -round any number to the nearest 10,100 or 1000 | -read, write, order and compare numbers up to 1000000 and determine the value of each digit -round any number up to $\mathbf{1 0 0 0 0 0 0}$ to the nearest $\mathbf{1 0 , 1 0 0 , 1 0 0 0 , 1 0 0 0 0}$ and 100000 | -read, write, order and compare numbers up to 10000000 and determine the value of each digit -round any whole number to a required degree of accuracy |
| Representing number | select the correct numeral for 1 to 20 objects | -identify and represent numbers using objects and pictorial representations including the number line, \& use language of: equal to, more than, less than (fewer), most, least oread and write numbers from 1 to 20 in numerals and words $\bullet$ read, write and interpret mathematical statements involving addition ( + ), subtraction ( - ) and equals (=) signs | -identify, represent and estimate numbers using different representations, including the number line $\bullet$ read and write numbers to at least 100 in numerals and in words | -identify, represent and estimate numbers using different representations $\bullet$ read and write numbers up to 1000 in numerals and in words | -identify, represent and estimate numbers using different representations ${ }^{\text {read Roman }}$ numerals to $\mathbf{1 0 0}$ (Ito C ) and know that over time, the numeral system changed to include the concept of zero and place value | -read Romannumeralsto 1000 (M) and recognise years written in Roman numerals orecognise anduse square numbers and cube numbers, and the notation for squared $\left(^{2}\right.$ ) and cubed ( ${ }^{3}$ ) |  |
| Number Facts (+/-) | use the language of more andfewer to compare two sets of objects, find one more or less in the given number up to 20 | -given a number, identify one more and one less ${ }^{-r e p r e s e n t ~ a n d ~ u s e ~}$ number bonds and related subtraction facts within 20 | - use place value andnumber facts to solve problems recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 |  |  |  |  |
| Mental +/_ | Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer. | add and subtract one-digit and twodigit numbers to $\mathbf{2 0}$, including zero | -add and subtract numbers using concrete objects, pictorial representations, and mentally, including: TU+U, TU+T, TU+TU and $\mathrm{U}+\mathrm{U}+\mathrm{U}$ eshow that addition of two numbers can be done inany order (commutative) and subtraction of one number from another cannot | -add and subtract numbers mentally, including: $\mathrm{HTU}+\mathrm{U}, \mathrm{HTU}+\mathrm{T}$ and $\mathrm{HTU}+\mathrm{H}$ |  | -add and subtract numbers mentally with increasingly large numbers | -perform mental calculations, including with mixed operations and large numbers |
| Written +/- |  |  |  | -add and subtract numbers with up to three digits, using formal written methods of columnar additionand subtraction | -add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate | $\bullet$-add and subtract whole numbers with more than 4 digits, including using formal written methods |  |
| Problems+/- |  | - solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7=\square-9$. | $\bullet$ solve problems with addition and subtraction, using concrete, pictorial and abstract representations -recognise and use the inverse relationship betweenaddition and subtraction and use thisto check calculations and solve missing number problems | -estimate the answer to a calculation and use inverse operations to check answers •solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction | -estimate anduse inverse operations to check answers to a calculation -solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why | $\bullet$ use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy •solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why |  |
| Number facts (x/-) |  |  | -recall and use multiplication and division facts for the 2,5 and 10 multiplication tables, including recognising odd and even numbers | -recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables | -recall multiplication and division facts for multiplication tables up to $12 \times 12$ | -identify multiples and factors, including finding allfactor pairs of a number, and common factors of two numbers $\bullet$ know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers eestablish whether a number up to 100 is prime and recall prime numbers up to 19 | -identify common factors, common multiples and prime number |
| Mental ( $\mathrm{X} /$ - ${ }^{\text {a }}$ |  |  | calculate mathematical statements for multiplication and division within the multiplication tables andwrite them using the multiplication (x), division ( $\div$ ) andequals ( $=$ ) signs•show that multiplication of two numbers can be done inany order (commutative) and division of | -write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numberstimes one-digit numbers, using mental methods | -use place value, known andderived facts to multiply and divide mentally, including: multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers $\bullet$ recognise and use factor pairs and commutativity in mental calculations | - multiply and divide numbers mentally drawing upon known facts -multiply and divide whole numbers and those involving decimals by 10 , 100 and 1000 | -perform mental calculations, including with mixed operations and large numbers |
| Written( $\mathbf{x} / \div$ ) |  |  |  | -Progress to formal written methods calculations as above | -multiply two-digit and three-digit numbers by a one-digit number using formal written layout - | multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including | -multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of |

|  |  |  |  |  |  | long multiplicationfor two-digit numbers •divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context | long multiplication •divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context odivide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Problems (x/-) |  | solve one-step problems involving multiplication and division, by calculating the answer using concete objects, pictorial representations and arrays with the support of the teacher | . -solve problemsinvolving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts | - -solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to mobjects. | solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such asn objects are connected to mobjects | -solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the mearing of the equals sign solve problems $^{2}$ involving multiplication and divisian, including scaling by simple fractions and problems involving simple rates | -use their knowledge of the order of operations to carry out calculations involving the four operations $\cdot$ solve addition and subtraction multi-step problems in contexts, deciding whin operations and methods touse and why esolve problems involving addition, subtraction, multiplication and division -use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy |
| Recognising factors | Begin to solve problems involving doubling, halving and sharing | -recognise, find and name a half as one of two equal parts of an object, shape or quantity orecognise, find and name a quarter as one of four equal parts of an object, shape or quantity | - $\cdot$ recognise, find, name and write fractions $1 / 3,1 / 4,2 / 4$ and $3 / 4$ of a length, shape, set of objects or quantity | -count up and down in tenths; -recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbersor quantities by 10 | -count up and down in hundredths; -recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. | -recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements >1 as a mixed number |  |
| Comparing Fractions |  |  |  | -com pare and order unit fractions, and fractions with the same denominators -recognise and show, using diagrams, equivalent fractions with small denominators | -recognise and show, using diagrams, families of common equivalent fractions | $\bullet$ compare and order fractions whose denominators are all multiples of the same number oidentify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths | -use common factors to simplify fractions euse common multiples to express fractions in the same denomination •compare and order fractions, including fractions > 1 |
| Finding fractions of quantities |  |  |  | recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators orecognise and use fractions as numbers: unit fractions and nonunit fractions with small denominators | -solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number |  |  |
| Fraction calculations |  |  | -write simple fractions for example, $1 / 2$ of $6=3$ and recognise the equivalence of $2 / 4$ and $1 / 2$. | -add and subtract fractions with the same denominator within one whde [for example, $5 / 7+1 / 7=6 / 7$ ] | -add and subtract fractions with the same denominator | -add and subtract fractions with the same denominator and denominators that are multiples of the same number omultiply proper fractions and mixed numbers by whole numbers, supported by materials anddiagrams | -add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions $\bullet$ multiply simple pairs of proper fractions, writing the answer in its simplest form •divide proper fractions by whole numbers |
| Decimals as fractional amounts |  |  |  |  | -recognise and write decimal equivalents of any number of tenths or hundredths $\bullet$ recognise and write decimal equivalents to $1 / 2,1 / 2$ and $3 / 4$ -find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths | -read and write decimal numbers as fractions | -associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction oidentify the value of each digit in numbers givento three decimal places |
| Ordering decimals |  |  |  |  | -round decimals with one decimal place to the nearest whole number -compare numbers with the same number of decimal places upto two decimal places | -recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents $\bullet$ round decimals with two decimal places to the nearest whole number and to one decimal place $\bullet$ read, write, order and compare numbers withup to three decimal places |  |
| Calculating with decimals |  |  |  |  |  |  | multiply and divide numbers by 10 , 100 and 1000 giving answers up to three decimal places ${ }^{-m u l t i p l y}$ one digit number with upto two decimal |

|  |  |  |  |  |  |  | places by whole numbers ause written division methods incases where the answer has up to two decimal places |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentages |  |  |  |  |  | recognise the per cent symbol (\%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100 , and as a decimal | -solve problems involving the calculation of percentages [for example, of measures, and such as $15 \%$ of 360 ] and the use of percentages for comparison |
| Fraction problems |  |  |  | -solve problems using al fraction knowledge | - solve simple measure and money problems involving fractions and decimals to two decimal places | -solve problems involving number up to three decimal places esolve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,2 / 5,4 / 5$ and those fractions with a denominator of a multiple of 10 or $\mathbf{2 5}$ | - solve problems which require answers to be rounded to specified degrees of accuracy •recall and use equivalences betweensimple fractions, decimals and percentages, including in different contexts |
| Ratio and proportion |  |  |  |  |  |  | solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts $\bullet$ solve problems involving similar shapes where the scale fador is known or can be found esolve problems involving unequal sharing and grouping using knowiedge of fractions and multiples. |
| Algebra |  |  |  |  |  |  | -use simple fomulae •generate and describe linear number sequences -express missing number problems algebraically 0 find pairs of numbers that satisfy an equation withtwo unknowns •enumerate possibilities of combinations of two variables. |
| Measures | order two or three items by LEDs or height, order twoitems by weight ar capacity, use everyday language to talk about size weight capacity, distance, order in sequence familiar events | -compare, describe and solve practical problems for: length/height, weight/mass, capacity/volume \& time ${ }^{\text {measure }}$ and begin to record length/height, weight/mass, capacity/volume \& time | -choose and use appropriate standard units to estimate and measure length/height ( $\mathrm{m} / \mathrm{cm}$ ); mass (kg/g); temperature ( ${ }^{\circ} \mathrm{C}$ ); capacity (litres $/ \mathrm{ml}$ ) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels •compare and order lengths, mass, volume/capacity and record the results using >, < and = | -measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass (kg/g); volume/capacity ( $/ \mathrm{ml}$ ) | -Convert between different units of measure estimate, compare and calculate different measures, including money in pounds and pence | -convert between different units of metric measure understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints •estimate volume and capacity | -solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate $\bullet u s e$, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places convert between miles and kilometres |
| Mensuration |  |  |  | measure the perimeter of simple 2.D shapes | -measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres find the area of rectilinear shapes by counting squares | -measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres -calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres $\left(\mathrm{cm}^{2}\right)$ and square metres ( $\mathrm{m}^{2}$ ) and estimate the area of irregular shapes. | -recognise that shapes with the same areas can have different perimeters and vice versa orecognise when it is possible to use formulae for area and volume of shapes -calculate the area of paralleograms and triangles $\bullet$ calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm3) and cubic metres ( m 3 ), and extending to other units |
| Money | use everyday language to talk about money | -recognise and know the value of different denominations of coins and notes | -recognise and use symbolsfor pounds (f) and pence (p); combine amounts to make a particular value -find different combinations of coins that equal the same amounts of money -solve simple problemsin a practical context involving addition and subtraction of money of the | -add and subtract amounts of money to give change, using both $£$ and $p$ in practical contexts |  | -use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling |  |
| Time | use everyday language to talk about time, | sequence events in chronological order using language recognise and use language relating to dates, including days of the week, weeks, months and years 0 tell the time to | $\bullet$ compare and sequence intenvals of time -tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times | -tell and write the time from an analogue clock, including using Roman numerals fromI to XII, and 12-hour and 24 -hour clocks -estimate and read time with | -Convert between different units of measure (e.g. Hours to minutes) -read, write and convert time between analogue and digital 12and 24 -hour clocks $\bullet$ solve problems | -solve problems involving converting between units of time |  |

|  |  | the hour and half past the hour and draw the hands on a clock face to show these times | $\bullet$ know the number of minutes in an hour and the number of hours ina day | increasing accuracy tothe nearest minute; record and compare time in terms of seconds, minutes and hours, use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight $\bullet$ know the number of seconds in a minute and the number of days in each month, year and leap | involving converting from hours to minutes; minutes to seconds; years to months; weeksto days |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Shape vocabulary | begin to use everyday terms to describe shapes, recognise create and describe patterns, | -recognise and name common 2-D shapes (e.g. Square, circle, triangle) -recognise and name common 3-D shapes (e.g. Cubes, cuboids, pyramids \& spheres)) | (vertices, edge, faces, symmetry | -identify horizontal and vertical lines and pairs of perpendicular and parallel lines |  |  | -illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius |
| Properties of 2-D shapes | begin to use everyday namesfor 2D shape's |  | -identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line. ©compare andsort common 2-D and 3-D shapes and everyday objects | -draw 2-D shapes | $\cdot$ compare and classify geometric shapes, including quadrilaterals and triangles, based on properties and sizes oidentify lines of symmetry in 2 D shapes presented in different orientations $\bullet$ complete a simple symmetricfigure with respect to a specific line of symmetry | . $\cdot$ use the properties of rectangles to deduce related facts and find missing lengths and angles adistinguish between regular and irregular polygons based on reasoning about equal sides and angles | $\bullet$ •draw 2-D shapes using given dimensions and angles compare and classify geometric shapes based on their properties and sizes |
| Properties of 3 D shapes | begin to use everyday namesfor 3D shapes |  | -identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces oidentify 2-D shapes on the surface of 3-D shapes. compare and sort common 2-D and 3-D shapes and everyday objects. | -make 3-D shapes using modelling materials recognise 3-D shapes in different orientations anddescribe them |  | -identify 3-D shapes, including cubes and other cuboids, from 2-D representations | -recognise, describe and build simple 3-D shapes, including making nets $\bullet$ find unknown angles in any triangles, quadrilaterals, and regular polygons |
| Angles |  |  |  | -recognise angles as a property of shape or a description of a tum -identify right angles, recognise that two right angles make a halftum, three make three quarters of a turn and four a complete turn oidentify whether angles are greater or less than right angle | -identify acute and obtuse angles and compare and order angles up to two right angles by size | -know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles -draw given angles, and measure them in degrees ( ${ }^{\circ}$ ) -identify angles at a point and one whole turn (total $360^{\circ}$ ); at a point on a straight ine and $1 / 2$ a turn (total $180^{\circ}$ ) identify other multiples of $90^{\circ}$ | recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles |
| Position and direction | use everyday language to talk about position and distance | describe position, direction and movement, including whole, half, quarter and threequarter turns | -order and arrange combinations mathematical objects in patterns and sequences. •use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotationas a turn and in terms of right angles for quarter, half and $3 / 4$ tums |  | -describe positions on a 2-D grid as coordinates in the first quadrant -describe movements between positions as translations of a given unit to the left/right andup/down -plot specified points and draw sides to complete a given polygon | -identify, describe and represert the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed | -describe positions on the full coordinate grid (all four quadrants) -draw and translate simple shapes on the coordinate plane, and reflect them in the axes. |
| Interpreting data |  |  | -interpret and construct simple pictograms, taly charts, block diagrams and simple tables | -interpret and present data using bar charts, pictograms and tables | -interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs | -complete, read and interpret information intables, including timetables | -interpret and construct pie charts and line graphs calculate and interpret the mean as an average |
| Extract fromdata |  |  | -ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity $\bullet$ ask and answer questions about totalling and comparing categorical data | - solve one-step and two-step questions [for example, How many more?' and 'How many fewer?'] using information presentedin scaled bar charts and pictograms and tables | - solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs | - solve comparison, sum and difference problems using information presentedin a line graph | - use pie charts and line graphs to solve problems |
